

AUSTRALIA TRAUMA TEAM TRAINING (ATTT)

This is a one day course to familiarise participants with the concepts of crisis resource management through the use of Simulation based training scenarios.

SUITABLE PARTICIPANTS:

This course is open to Doctors, Nurses, Defence Health Personnel and St John Ambulance staff who are involved in trauma teams.

- OBJECTIVES:**
- To use a standard structure team approach for early recognition and stabilisation of traumatic emergencies presenting to the trauma centre
 - Effective team leadership and team interaction
 - Skills for working effectively at an organisational level, including decision making regarding consultation and disposition
 - Skills for safe practice and error minimisation
 - Developing an understanding of and familiarity with the concept of crisis resource management
