

HOSPITAL MIMMS ADVANCED (HMIMMS ADV)

While traditional MIMMS teaches a structured approach to responding at the scene of mass casualty incidents, HMIMMS focusses on the delivery of care in the hospital environment.

This 2 day course explores the priorities and responsibilities of clinical and administrative responders facing a mass casualty incident in their hospital. An all-hazards approach is adopted while special incidents such as burns and chemical hazards are also covered. The concept of the collapsible hierarchy is introduced as a fundamental concept in the hospital based response.

THE FORMAT INCLUDES:

- Lectures
- Small group workshops
- Novel interactive tabletop sessions which simulate the challenges facing responders during the phases of patient reception, definitive care and recovery.

SUITABLE PARTICIPANTS:

- This course is aimed at personnel who would be involved in managing a major incident in the hospital. This can be clinical or non-clinical.
